

School Life

Christmas Tree

The first day of December began at school in an atmosphere of merry expectations. Garlands and toys, part of the Christmas decoration, were shining in the rooms. The children eagerly went to the school yard to see how the school Christmas Tree would be lighted. The holiday ceremony started with songs and poems. Mr. Angelov, the school principal, greeted the gathered students, teachers, parents and guests. Our Christmas tree was lighted up and so were the shining eyes of the children. Santa Claus wished the children successful and happy days till the holidays. The dwarves standing near the Christmas tree were the merriest of all present. Following the tradition, we ended the event with a merry folk dance.

Success Project

The activity of the Healthy, Strong and Successful Club is a natural continuation of the work done in classes. The goal of the club is to increase the amount of organised physical activity through physical exercises, games and competitions and to help the formation of long term needs for and active interest in sporting activities and applying individually the means for physical training. Being a part of the club allows each child to demonstrate his individual abilities, build new relationships and take on new responsibilities. The gaming and competitive nature of the activities contributes to the establishing of the moral qualities and the will of the children and it also increases their self-confidence and makes them more confident that they are capable and successful individuals.
