PROJECT 'SUCCESS'

Movement is life

"Movement is health and health is life" - there is hardly anyone who can doubt this maxim. Not surprisingly, our body is well designed and adapted for movement, "equipped" with a complex and stable physical structure and all organs and systems are closely related to physical activity.

The human body is a unique system, that may exist and to improve only in a harmonious mental and physical exercise. Movement is the basis of our lives. Physical activity leads to improvement human capabilities and it is an effective factor for harmonious physical development in children and adolescents.

Therefore, the main task of this project is motivating more students to systematic physical exercises and sports.
