HEALTH

On 17.10.2012 in our school a health check of the students from 5th to 7th grade was carried out according to the programme of Plovdiv Municipality against overweight, with the assistance of the Sports dispensaries.

Dr. Stoyanova determined BMI (body mass index) of each child using " Sanita" apparatus.

Why do children steal?

Many parents believe that misconduct should be seriously punished for not been repeated. Misleading! The child listens with half an ear the guidance of his father, obediently sitting at home on Sunday, then returns to his friends again and steals again. What to do? You should go back to the beginning and try to understand what drives the child to a theft.

A low self-esteem? Loneliness at home and at school?

Pressure from the friends Boredom? Thirst for adventures? If you can not find the key to the behavior of the child you should ask a psychologist.

It is known that adolescents often prefer their coevals` opinion to that of their parents. So, the adults should first create an early credibility, rather than waiting for exceptional circumstances. Children in each age should know that behind their back there is a mother and a father, who are always ready to listen, understand and help them. If there isn`t such a relationship, it will be more difficult to fight your child`s desire to steal.

LIBRARY

Last week, the library held the first lesson with students from second grade for increasing their librarian and bibliographic culture. The lesson was on "What is a dictionary? Understanding and working with a spelling and an encyclopedic dictionary. "After the theoretical part of the lesson where the children were acquainted separately with each of the dictionaries, fun exercise followed by searching words, that brought cheer to the end of the time.
