

SCHOOL LIFE

SCHOOL PARTNERSHIPS-“COMENIUS”PROGRAM

From October 16 to 20, 2013 our school is going to be a host of interesting events. We expect a visit of group of teachers and students from the UK, Spain and Turkey - EU partners of Bulgaria in the European project "Lifelong learning" under "Comenius" program.

Their visit is related to the project in which a team of students and teachers from "Aleko Konstantinov " Primary school works. The project is entitled " Listen to the voice of nature" and it's aims are to introduce young people with problems related to the environment and natural resources, climate change and ecosystem.

Schools working on the project will present the implemented activities dedicated to the preservation of nature and recycling. We hope to exchange knowledge, ideas and best practices. Our guests will have the opportunity to visit the sights of our city and enjoy the beauty of the city. They will witness the cultural events, will be introduced with interesting people and create new friendships.

UPCOMING EDUCATION

On 18th October 2013 at 12.00 am at the school "Aleko Konstantinov" Primary school will be hold training of teaching staff , which is the first stage of the pilot project for the introduction of teacher's portfolio. Development and implementation of the electronic version of the teacher's portfolio is a joint project of "Aleko Konstantinov " and the European Centre for Sustainable development in education. Leading trainer is Prof. Mariana Stefanova .

Teacher's portfolio will finalize the cycle of the input this format for self expression and it is a natural extension of student's portfolio , which is introduced for students from grade 1 to 4 and in part to secondary school students .

In this connection it should be noted that the original copyrights for student portfolio was created by a team of teachers from "Aleko Konstantinov" and it is available for free for whole education community in Bulgaria.

ECOLOGY

Dear readers, this school year we start our new section in our school newspaper-"Ecology".

You will have the opportunity to learn about interesting facts related to nature and it,s protection . We begin , of course, with some information of the science Ecology.

Ecology is the science section of the biology that studies the interactions between organisms and relationships between organisms and the environment where they live . The main object of study of ecology are ecosystems, railroads of plants, animals and other organisms in a given geographical region which depend on each other . Ecology is the science economy of living nature.

The subject of ecology are common processes and principles of biosphere :

- life processes
- distribution and numbers of community of organisms
- the flow of material and energy in living communities
- development of Ecosystems
- biodiversity

There are four main circles of life - water , terrestrial, soil and organismal .

Environment has many practical applications in areas as management of natural resources, agriculture, forestry, fishing management , urban development, health, economy and gives the principal basis for survey of public interactions in humans.

OUR NEW SUCCESS IN CHESS TOURNAMENT

From 29th September to 8th October 2013 in the town of Budva, Montenegro was held the first European chess championship for children from 8 to 18 years. In the tournament to 8 years Georgi Kolev – 2nd grade student of “Aleko Konstantinov” Primary school excellently presented our school, city and country. He was ranked 26th total of 90 players from across Europe to result 5.5 points from 9 rounds. Lot assigned him to play five games against players from strong Russian school, which makes this result even more valuable.

5th OCTOBER -AN INTERNATIONAL DAY OF TEACHERS

Discover new, be creative and do not stop to sculpt our future - the children!
Congratulations dear teachers!
