

SCHOOL LIFE

Start of Creative activities at "Aleko Konstantinov" Primary school Youth academy "Creative sparks"

This year "Aleko Konstantinov" Primary school continues to involve its students in the challenge called work on projects. The project is called "Fire of Orpheus" and the goal - to allow children to express themselves in art, theater, vocal art, literature and classes of piano and guitar.

The first meeting with the experts of the foundation- Eugenia Tagareva and Denitza Gerginikova, held on 23 October 2013, was extremely emotional.

Participants were not limited in the frame of an art ! We are extremely happy- the students are willing to help as volunteers in organizing events to capture and publish materials related to work of the project. We wish all participants success, inspiration and courage to follow their dreams!

SCHOOL FOR PARENTS

How to protect the children on the road

Dear Parents,

To protect the lives of children on the road you have to follow basic rules:

- accompanied your child to school, explaining constantly him or her the traffic rules of pedestrian and roadway intersections around schools , the importance of traffic lights ;
- determine which is the shortest and safest route for your child to walk and come home from school. Practise the route several times with him/her to be sure that the route is remembered ;
- Control personally, whether the child complies with your instructions for crossing and that she/he walks on the agreed route ;
- Explain to your child that he/she should not cross in front of the stopped bus and behind the parked car;
- Arrange with your child a safe place to play after she/he prepares lessons for the next day ;
- use the time of travel to explain clearly what is seen on roadway - road signs , errors and dangerous behavior of adults and children on the street;
- use the first days of the school year to remind your child the rules for safe movement of pedestrians ;
- make sure that before your child goes out to ride a bike or roller skates , she/he wears the necessary protective equipment and attached reflective elements .
